How to write blog posts that Google and Readers will love?

Planning

- ☐ Understand your audience.
- ☐ Ensure your content offers real value.
- ☐ Decide on a topic.
- ☐ Align content with what users are seeking.
- ☐ Identify effective keywords.
- ☐ Defining primary keyword(s)
- ☐ Defining semantically related keywords
- ☐ Create a rough outline for your post.

Writing

- ☐ Write 2-3 sentence paragraphs.
- ☐ Use **bold** and *italic*.
- ☐ Use keywords in the first 100 words.
- ☐ Use 1-3 internal links per 500 words.
- ☐ Use 1-2 links to external authorities.
- ☐ Use bullet points and lists.
- ☐ Add call to action.

Optimizing

- ☐ **URL.** *Aim for a maximum of 10 words in the URL (incl. the domain). Use hyphens instead of spaces. Use lowercase.*
- ☐ **Meta title.** *Keep it between 50-60 characters. Include your primary keyword(s). Keep them short and precise.*
- ☐ **Meta descriptions.** *Keep it below 51- 155 characters. Write it as a descriptive text. Add a call to action.*
- ☐ **Headings.** *They should summarise the proceeding content. Include primary keyword(s) in H1.*
- ☐ **Image Files.** *Keep images below 140kb. Use descriptive file names before you upload images to the site.*
- ☐ **Images Alt tag.** *Compose image alt tags as descriptive sentences to clearly explain the image's content.*

Promote it!

- ☐ **Write guest posts** *on industry topics related to your blog and include a link to your post.*
- ☐ **Paid advertising.** *On Facebook, you can boost your post to reach new audiences. On Twitter, you can create promoted tweets. On LinkedIn, you can use sponsored audiences.*
- ☐ **Reach out.** *Contact individuals mentioned or linked in your post to see if they'll share it with their followers.*
- ☐ **Use your email.** *Add links to your blog posts in your email signature.*
- ☐ Share it across **your social media accounts.**
